RFC PROTOCOL BABEL

Communication between two clients using UDP protocol

Clients MUST handle the following commands :

ASK_FOR_DISCUSSION <LF> : Start to communicate audio with the host

TERMINATE <LF>   : Stop the communication.

Client MAY send audio directly using his favorite class. The object (audio) will be automatically **serialized** in the background, sent over UDP then deserialized to be read as an object

HEADER 8 BYTES
Value : the size of the following message

AUDIO
(serialized)
